

Retail Pro Sub Location Tool Gives You Complete Control Over Your Inventory

Overview

Retail Pro's new Sub Location Inventory Management feature is a versatile tool that enables retailers to track the movement of merchandise within a given store's inventory. All movements of merchandise between Sub Locations are recorded on standard Retail Pro transaction documents, giving you versatile tools to manage your inventory effectively and making your reporting needs a snap.

Sub Location Features

- Ability to scale Sub Locations as the retailer's individual store needs expand within Retail Pro
- Ability to designate "Secure" Sub Locations for high value or security sensitive inventory
- You can centrally manage Sub Locations for your different store layouts or types
- Complete control over number and type of Sub Location assignments within a store
- Ability to assign the use of a particular Sub Location per transactional document per store
- Deactivate, edit, or modify Sub Locations as you manage your inventory
- Control employee access by assigning security rights assigned to groups

- Effectively use serial number and lot number tracking in conjunction with Sub Locations
- Specify whether an item in a Sub Location can be sold or should be treated as reserved inventory
- Assign a Sub Location specific price level to a Sub Location - Very useful for clearance bins, sidewalk sales, etc.
- Perform Physical Inventory (PI) for Sub Locations
- Print Sub Location information on any document (i.e. Receipt, Tag, inventory list)
- Sub Location specific Retail Pro reports allowing the reporting of individual item locations, items located in a specific Sub Location, or Sales for specific Sub Locations to see what area is moving merchandise
- Easily manage all Sub Locations and their inventory within the Sub Location management console
- Ability to view an inventory items location across multiple Sub Locations.

The Sub Location module allows complete flexibility to structure and define your inventory to be most effective and manageable ensuring you are kept aware where your inventory is at all times within the store. As Sales are made

Serious software for serious retailers™

and goods sold, you know exactly which items are being sold and from which Sub Location, giving you a clear direction for managing your inventory. In addition, to managing and tracking inventory that is physically in your stores, Retail Pro's Sub Location functionality can be used to track inventory which is out on loan to a VIP for a show or out for warranty and repair work or special services.

In short, Retail Pro's new Sub Location functionality brings an unprecedented level of control over your inventory and its physical location. Through the use of this powerful

new module and Retail Pro's existing powerful inventory management utilities you can rest easily knowing your inventory levels and needs are never in questions because you weren't informed properly.

Compatibility and How to Buy

Retail Pro's Sub Location Inventory Management module is available for Retail Pro 9.2. Consult with your authorized Retail Pro business partner for pricing, configuration, and to ensure specific version compatibility.
